## The Innovation Society, Sustainability, and ICT

**From** 2011-03-01 **to** 2014-02-28

Our society is organized around a positive feedback dynamic that produces innovation cascades. In these cascades, new artifacts are inextricably linked with transformations in social organization and the generation of new 'needs' for individual and society. Besides desired effects, these cascades produce disruptive changes in the environment and in society itself, ultimately leading to sustainabil...

- **HERITECHS** Depto. ANÁLISIS ECONÓMICO APLICADO

## What is HERITECHS?

HERITECHS (Heritage, Cultural Economics, Technology and Sustainability) is built on the experience and expertise gained from managing the interdisciplinary and international program Master TPTI. The main objectives of HERITECHS are:

- to ensure double proficiency in both **history** as well as **applied sciences** (architecture, economics of cultural goods or technology) that satisfies requirements of **heritage management professionals** world wide.
- to develop a new action-research field combined with economics, based on knowledge, cultural heritage, tourism and sustainable development. The recently commenced COST program (Action IS1007) - Researching Cultural Sustainability - rightly demonstrates this interdisciplinary framework.

HERITECHS is an **international doctoral program, offered by six universities:**

[University of Paris 1 Panthéon Sorbonne](#) (project coordinator) (France)

[University of Padova](#) (Italy)

[University of Evora](#) (Portugal)

[University of Alicante](#) (Spain)

[Faculty of Letters and Humanities of Sfax](#) (Tunisia)

[Federal University of Parana](#) (Brazil).

This professional doctoral program is designed for **future administrators and entrepreneurs of cultural goods**, and provides training to this unique combination of applied history, economics of knowledge and sustainable development.

**Topic:** Climate change mitigation options

**SC5-05a-2014**

[Topic Description](#)

[Topic Conditions & Documents](#)

[Submission Service](#)

**Specific challenge:** The pace of current developments and uncertainties surrounding likely future trends requires further steps to maintain and strengthen the evidence base to ensure that policy makers, businesses and citizens in the EU can continue to draw on a sound understanding of the state of the climate and the wider environment, the possible response options and their consequences in social, economic and environmental terms.

Better integration and coordination of on-going and future climate change research and innovation initiatives within the EU and beyond is needed, accompanied by timely and open exchange of information and research results to enhance the impact of research and ensure a more efficient use of resources and scientific developments.

**Scope:** Creation of EU climate change networks to facilitate dialogue among the relevant scientific communities, funding bodies and user communities in the EU throughout the duration of Horizon 2020 and enhance effective communication and dissemination activities targeting different stakeholders, to maximise the impacts of the research and innovation initiatives and increase public awareness about climate science and research results. Proposals should cover activities such as clustering, co-ordinating and creating synergies between international, EU and nationally funded climate change research and innovation actions, developing joint programmes and projects, creating links with related international programmes, forward

## Topics for Gender

An in-depth understanding of men and women's needs, behaviours and attitudes contributes to improve the scientific quality and societal relevance of the produced knowledge, technology and/or innovation. It also leads to produce goods and services better suited to potential markets.

Applicants are encouraged to develop a gender dimension in their projects whenever relevant. A topic is considered gender relevant when it concerns individuals of groups of persons and/or when its findings may affect individuals or groups.

### News

H2020 call for expression for interest for experts (11/2013)  
New calls for expression of interest for individual experts and for organisations to suggest experts were just published in OJ C342 of 22 November 2013. European Commission will soon need experts to evaluate first Horizon 2020 proposals. Don't forget to tick the H2020 box in the registration platform and update your expertise.

### Quick Links

- FAQ for Experts
- Expert recommendations

### Logistics for Brussels

- Map of evaluation area
- Info on hotels
- Metro map
- From airport to Brussels

### Experts

Join the database of independent experts for Europe

The European Commission appoints independent experts for research and innovation assignments including the evaluation of projects, and evaluation of programmes, and design of projects.

### New experts

#### Who can be an expert?

You have a chance of being selected as an expert if you:

- have high-level of expertise in the relevant fields of research and innovation (see call for details on types of expertise).
- can be available for occasional, short-term assignments

[REGISTER AS EXPERT](#)

#### What do experts do?

Experts, as peer reviewers

- evaluation of proposals
- monitoring of actions

In addition, experts assist

- preparation, implementation and evaluation of programmes and design of projects

Assignments mainly concern research and innovation falling within the Horizon 2020 funding programme. They address the challenges Europe faces in funding excellent science, technology and innovation.

Take a look at the most recent assignments.

In order to access the expert registration form, you are first asked to login with a valid Participant Portal account. If you do not have it yet, it is easy to [create your Portal \(ECAS\) account](#).
